

Mystery of Universe

Have you ever thought about the moment
When your life will be cut short
By unknown natural forces
Or by the hand of Destiny?
Then what will happen to your little world?

Living in a certain time and space,
Within certain limits and laws,
We are trying to create our own world,
Living in it mostly, we are trying to use kind words
To show love, caring and affection,
Sometimes we use Silence
Or harsh words as a shield: “Defense mechanism”
To protect ourselves
From unexpected swords.

Anything you do: bad or good,
Will come back to hurt or reward you,
And you will have no power to control it.
We rarely use healing words to build another’s self-esteem
Or rescue them from their own collapsing tower.

Have you ever thought that we are all connected?
Our little worlds are part of this Universe,
The bigger world,
That’s why people say “Be careful what you wish for,
You might just get it.”

**So always do good things and wish big
And I’m sure you will not regret it.**
